ROHAN ATUL MEHTA

+91 9082918287 | rohanmehta39947@gmail.com | LinkedIn | GitHub | Medium | Portfolio

SUMMARY

Detail-oriented Data Analyst and BCA graduate with a strong foundation in data manipulation, exploratory analysis, and predictive modeling. Proficient in Python, SQL, Power BI, Machine Learning and NLP, with experience building and deploying deep learning models, with demonstrated experience in processing complex datasets, building interactive dashboards, and developing quantitative solutions. Adaptable team player passionate about converting complex raw data into actionable strategic insights to drive business performance.

EXPERIENCE

Full Stack Developer **Sep 2026 – Present**

ILACAD • Full-time | Mumbai, Maharashtra, India

- Develop and maintain responsive web applications using PHP, HTML, CSS, JavaScript, and MySQL.
- Work across both frontend and backend components, including database integration and API development.
- Contribute to the development and maintenance of an LMS and multiple organizational websites.
- Implement new features, troubleshoot issues, perform testing, and optimize application performance.
- Work with version control and follow development best practices for maintaining and deploying web applications.
- Collaborate with internal teams to understand requirements and deliver functional web solutions.

EDUCATION

Postgraduate Program in Data Science, AI and Analytics **2026**

Imarticus Learning, Andheri, Mumbai

Bachelor in Computer Applications (BCA) **2026**

Amity University, Noida, Uttar Pradesh

Junior College (PCM) **2023**

Durgadevi Saraf Junior College, Mumbai, Maharashtra

Secondary School Certificate (10th) **2021**

Dr. Sarvepalli Radhakrishnan Vidyalaya, Mumbai, Maharashtra

PROJECTS

AutoDiag AI – Intelligent Car Fault Diagnosis Chatbot | Click

- Built an end-to-end NLP system that classifies free-text car complaints into 41 fault categories across 9 vehicle systems, deployed as an interactive Streamlit chatbot.
- Cleaned a 14,350-record dataset containing 12 categories of real-world data-quality issues, including six date formats, mixed currency encodings, disguised nulls, duplicate records, and impossible outliers, with assertion-based validation.
- Engineered NLP features using TF-IDF with unigrams and bigrams, applying leakage-safe fitting and stratified splitting across all 41 classes.
- Trained and benchmarked six models spanning classical ML and deep learning: Naive Bayes, Logistic Regression, Linear SVM, Random Forest, BiLSTM, and a fine-tuned DistilBERT transformer, achieving 87% accuracy and 95% top-3 accuracy.
- Architected a knowledge-grounded chatbot using Streamlit and the Groq API (Llama 3.3), where the LLM only rephrases verified safety facts, preventing hallucinated advice.

Apple Ecosystem Customer Retention Dashboard | Click

- Developed an end-to-end customer retention analytics solution using Python, Power BI, and DAX on a synthetic dataset of 100,000 Apple users.
- Performed comprehensive data cleaning, preprocessing, and exploratory data analysis (EDA) using Pandas and NumPy.
- Built an interactive 4-page Power BI dashboard featuring 20+ KPIs and visualizations for churn analysis, ecosystem engagement, and customer segmentation.
- Created reusable DAX measures to calculate retention rate, churn rate, customer lifetime value, device ownership metrics, and ecosystem engagement.
- Identified major business drivers of customer churn, including device ownership, iCloud subscription tier, customer satisfaction, and support ticket frequency.
- Presented actionable business recommendations to improve customer retention and increase ecosystem adoption.

SQL Database & Driver-Team Performance Analysis | Click

- Designed a normalized relational database schema with foreign key constraints to model driver and team performance data accurately.
- Authored complex SQL queries utilizing multi-table INNER/LEFT JOINs, aggregations, subqueries, and windowing techniques.
- Analyzed seasonal participation trends and performance metrics through self-joins and advanced conditional filtering.

SKILLS

Programming Languages:	Python, C, C++, R, Java, Core Java, C#
Data & Visualization:	Microsoft Power BI, Microsoft Excel (Pivot Tables, Advanced Formulas), Pandas, NumPy, Tableau
Database Management:	MySQL, Microsoft SQL Server Management Studio (SSMS), SQL (Joins, Subqueries, Aggregations)
Machine Learning:	Supervised/Unsupervised Learning, Deep Learning (TensorFlow/Keras), NLP (TF-IDF, Transformers, DistilBERT), Scikit-learn, Streamlit, LLM APIs, Data Preprocessing
Web Technologies:	HTML, CSS, JavaScript, PHP
Professional Skills:	Data Analysis, Problem Solving, Critical Thinking, Technical Teamwork

CERTIFICATIONS

1. **Imarticus Learning – Postgraduate Program in Data Science and Analytics with GenAI** **Aug 2026**
   - Awarded Certificate of Excellence (Credential ID: EK2ZSRR94180R2) accredited by NSDC & Skill India for mastering end-to-end data analytics and Generative AI workflows.
   - Gained hands-on expertise in predictive modeling, statistical analysis, interactive visualization, and LLM implementation.
2. **Deloitte (Australia) – Data Analytics** **Feb 2026**
   - Completed job simulation involving data analysis, data transformation, and forensic technology practices.
   - Engineered an interactive dashboard using Tableau to visualize key client insights and operational trends.
3. **JPMorgan Chase & Co. – Quantitative Research** **Jan 2026**
   - Completed simulation focused on quantitative research methods and credit risk analysis.
   - Analyzed a comprehensive loan portfolio to model risk factors and estimate customer probability of default.
4. **Quantium – Data Analytics Job Simulation** **Jan 2026**
   - Developed expertise in data preparation and customer analytics using transaction datasets to extract actionable insights.
   - Formulated data-driven commercial recommendations to optimize customer strategy for business stakeholders.

COURSEWORK

Smart I.T. Professional **2025**

Raj Computers Academy

- Covered core computer applications, IT infrastructure, software fundamentals, and practical database management techniques.
